Mr. Hari Kumar

International Institute of Information Technology
Hyderabad

Dear Mr. Hari Kumar,

With this letter and the attached resume, I would like to express my sincere interest in the Junior Research Fellow (JRF) position you have available. I am a solutions-oriented person who thrives in challenging, fast-paced environments where my performance directly impacts the bottom line. I believe that my strong background in IT combined with my extensive experience in planning, executing, monitoring, and closing a variety of projects, makes me ideally suited to this JRF position.

My new Android App is now on [PlayStore](#) which can Automate Home Appliances and Manage Mobile Charging using ESP32, Relay module and some wires, all source has been uploaded on [GitHub](#). It's been my passion to create projects since my 2nd year of college, now I want to make my career in Embedded Systems.

I always wanted to innovate new projects but could not find right platform or someone who can guide me right path. I bring to research work my years of relevant experience and my drive for results and positive outcomes. I am prepared for the next challenge in my career and look forward to hearing from you.

Sincerely,

Vicky Kumar
